US-10-627-253A-301
US-10-627-253A-301
Sequence 301, Application US/10627253A
Sequence 301, Application US/10627253A
Publication No. US2004016176BA1
GENERAL INPORMATION:
APPLICANT: HOFFMEYER, SVEN
APPLICANT: HOFFMEYER, SVEN
TITLE OF INVENTION: POLYWORPHISMS IN THE HUMAN GENE FOR THE MULTIDRUG
TITLE OF INVENTION: RESISTANCE-ASSOCIATED PROTEIN 1 (MRP-1) AND THEIR USE IN
TITLE OF INVENTION: DIAGNOSTIC AND THERAPEUTIC APPLICATIONS
TITLE REPERENCE: VOS-42 CON
TURBENT APPLICATION NUMBER: US/10/627,253A
CURRENT FILING DATE: 2003-07-24
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö

Sequence 294, Application US/10484577

Publication No. US20050032724A1

GENERAL INFORMATION:
TITLE OF INVENTION: Means and methods for improved treatment of cancer based on UGT1.
TITLE REPERENCE: F2285CT-1

CURRENT APPLICATION NUMBER: US/10/484,577

CURRENT APPLICATION NUMBER: PCT/EP 02/08220

PRIOR APPLICATION NUMBER: EP 01 11 7608.8

PRIOR FILING DATE: 2002-07-23

PRIOR FILING DATE: 2002-07-23

JE-09-969-373-2494

Sequence 2494, Application US/09969373

Patent No. US20020133852A1

GENERAL INFORMATION:

APPLICANT: Effertz, Roger J.

APPLICANT: Hauge, Brian M.

TITLE OF INVENTION: Soybean SSRs and Methods of Genotyping TITLE OF INVENTION: 100/100-02

FILE REFERENCE: 38-10(52679)A

CURRENT APPLICATION NUMBER: US/09/969,373

CURRENT FILING DATE: 2001-10-02

PRIOR APPLICATION NUMBER: US 09/754,853

PRIOR FILING DATE: 2001-01-05

PRIOR APPLICATION NUMBER: US 09/760,427

PRIOR APPLICATION NUMBER: US 09/805,768

PRIOR PILING DATE: 2001-01-13

PRIOR PILING DATE: 2001-01-13

Septicant: Mcswiggen, James

APPLICANT: Mcswiggen, James

APPLICANT: Pavco, Pamela

APPLICANT: Macejak, Dennis

TITLE OF INVENTION: ENZYMATIC UUCLEIC ACID TREATMENT OF DISEASES OR CONDITIONS RELATE

TITLE OF INVENTION: HEPATITIS C VIRUS INFECTION

FILE REFERENCE: 1994-03-23

CURRENT APPLICATION NUMBER: 09/257,608

PRIOR APPLICATION NUMBER: 60/100,842

PRIOR APPLICATION NUMBER: 60/003,217

PRIOR APPLICATION NUMBER: 60/003,217

PRIOR APPLICATION NUMBER: 60/003,217

PRIOR PILING DATE: 1998-04-27

NUMBER OF SEQ ID NOS: 3148

SOFFWARE: Patentin version 3.0
                                                                                                                                                 US-09-504-231A-706

1 Sequence 706, Application US/09504231A

1 Sequence 706, Application US/09504231A

1 Patent No. US20020013458A1

2 GENERAL INFORMATION:
